## Chapter Overview, Continued

### Before You Begin

- The LN RPA process is the same as the Appropriated Fund RPA, except:
  - Some of the data fields are grayed out and the information must be input through the **Extra Information** Taskflow Button DDFs, i.e. **Awards, Separations**, etc.
  - The SSAN is not auto-populated on page 1 of the RPA. The SSAN is input by selecting the **Extra Information** Taskflow Button. Select the **Local National Unique Data Type**. Click the **Details** area and input the SSAN in the **Employee ID Number** data field.
  - There are unique NOAs for each country. Those prefixed with an “X” must only be used with a correction action.
  - There are only two **Authority Codes** on LN actions, which may be optional for your country.
  - To update HR, you must **de-select the printer** to receive LN forms.
  - **Extra Information** Taskflow Button contains most of the necessary employee information in the DDFs.
  - **Special Information (SITs)** Taskflow Button contain multiple occurrence fields, i.e., training, appraisals, language, etc.
  - **Italy** and **Germany** users must refresh the RPA (use the Refresh Button at the top of the RPA) prior to update to invoke salary computations.

**Note:** Just as with the Appropriated Fund actions, the <**Person**>, <**Position**>, and <**Others**> Taskflow Buttons are used only to view information. You cannot update this information through the RPA. Most updates must be processed separately on the **Position** or **People** Windows.
